The preparation of this bibliography was an outgrowth of requests received by the Medical Library for the latest material on rehabilitation. An attempt was made to give a general survey of the field, and, in some instances list articles of specific interest to the Medical Staff of this hospital.

No attempt was made to list books before 1939, nor periodical articles before 1941. The entries included terminate with findings through June, 1943.

References to foreign language periodicals were omitted.

This bibliography does not include references to tuberculosis, sight, hearing, and advanced psychopathic states.

The library was limited, in compilation, to the following sources:
